PLACES in a nutshell.....

PLACES stands for: *Playful Learning and Storytelling that Create Engagement for the Sustainable Development Goals among Children and Young People.* The PLACES project was developed to support the implementation of the Sustainable Development Goals (SDGs) and the European integration project.

The story about PLACES

SHARING A FIRE

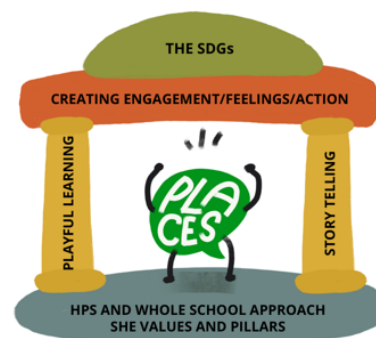

The best part of enlightenment, is the part of sharing it with others, right? Just like sitting around a bonfire where we share the warmth and the sight of the flames dancing with the wind. That is probably why you became a teacher - that's why we all bother. The joy of seeing children's eyes glow when they are "in" for learning and listening. Maybe it is time to rekindle and rethink the way we share learning with children; to put new wood on the bonfire and let sparks fly.

If you are in for this, then come join us in a playful and enlightening adventure, about how to use playful learning and storytelling to turn on the light in children's eyes, through learning about the Sustainable Development Goals in a fun and inspiring way.

We want you to be a part of this! So come find your seat in the circle around the bonfire and under the stars. Bring your personal piece of wood, so that we can share the warmth and the glow from the flames, that remind of us the lighting up of children's eyes when they are enlightened. The time for playful storytelling comes closer.....
